Patient Name _____ **Today's Date** _____

PRESCRIPTION

Qualifications

- Patient must meet the DSM-5 diagnostic criteria for single-episode major depressive disorder (MDD) with the duration of greater than or equal to 2 years; OR recurrent MDD without psychotic features
- Patient must have had an inadequate response to at least 2 oral antidepressant treatments taken at adequate dosage and for adequate duration which is defined as the following:
The trial was at least 6 weeks at generally accepted doses; AND patient was ≥80% adherent during the trial
- Patient must have depression symptom severity of at least 28 on the MADRS rating scale

SPRAVATO® (esketamine) nasal spray 56 mg 84 mg
****This is a controlled substance.** Please fax a copy of this form along with your electronic prescription.**
NCPDP #: _____

Treatment-Resistant Depression

- Induction Phase Weeks 1 to 4: Administer twice per week Day 1 starting dose: 56 mg; Subsequent doses: 56 mg or 84 mg
 - Maintenance Phase Weeks 5 to 8: Administer once weekly 56 mg or 84 mg
 - Week 9 and after: Administer every 2 weeks or once weekly* 56 mg or 84 mg
- * Dosing frequency should be individualized to the least frequent dosing to maintain remission/response.

Major Depressive Disorder with Acute Suicidal Ideation or Behavior Administer SPRAVATO in conjunction with an oral antidepressant.

The recommended dosage of SPRAVATO for this treatment is 84 mg twice per week for 4 weeks.

Dosage may be reduced to 56 mg twice per week based on tolerability. After 4 weeks of treatment, evidence of therapeutic benefit should be evaluated to determine need for continued treatment.

The use of SPRAVATO, in conjunction with an oral antidepressant, beyond 4 weeks has not been systematically evaluated in the treatment of depressive symptoms in patients with MDD with acute suicidal ideation or behavior.

Administration

- Spravato** is only to be administered under direct supervision of a healthcare professional with adequate patient monitoring facilities
- Provider, patient, and facility must be enrolled in the **Spravato (esketamine) REMS program**

Will your office be administering Spravato?

Practice _____

Yes, all doses at our practice:

Address _____

No, Please visit provider indicated:

Phone: _____ Fax: _____

SPRAVATO® REMS (RISK EVALUATION AND MITIGATION STRATEGY)

What is the purpose of the REMS? The goal of the REMS is to mitigate the risks of serious adverse outcomes resulting from sedation and dissociation caused by SPRAVATO administration, and abuse and misuse of SPRAVATO by:

- Ensuring that SPRAVATO is only dispensed and administered to patients in a medically supervised healthcare setting that monitors these patients
- Ensuring pharmacies and healthcare settings that dispense SPRAVATO are certified
- Ensuring that each patient is informed about the serious adverse outcomes resulting from sedation and dissociation and need for monitoring
- Enrolling all patients who receive treatment in an outpatient healthcare setting in a registry to further characterize the risks and support safe use
